### **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 1. Claims 6-8 are rejected under 35 U.S.C. 102(e) as being anticipated by US Patent No.6127656 to Kilmer et al.

Kilmer teaches an air pump with a movable diaphragm in a chamber, at least one out port, a threaded shaft operatively connected to the diaphragm, the shaft having an axis, and a motor which oscillates the diaphragm axially the motor being coupled to the diagram thought threaded engagement with the shaft that translates motor rotation into diaphragm oscillation. (figure 5, Col.6, lines 40-60)

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 09/591,981 Page 3

Art Unit: 3763

2. Claims 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent No6461324 to Schlensog and further in view of US Patent NO.5749850 to Williams et al.

Schlensog teaches a milk expressing device with a housing, a liner extending from the inlet to the outer said liner being sealed to the inlet by a press fit connection of the liner into a fist groove in the housing, and the liner being sealed to the outlet by a press fit connection into a second groove in the housing. Schlensog however, does not teach a pad located in the housing. Williams teaches a pad in the housing of a breast pump. Therefore it would have been obvious to one having ordinarily skill in the art to have added the padding of Williams to the invention of Schlensog because according to Williams the padding increases comfort for the user. (Col.7, lines 15-20)

## Allowable Subject Matter

3. Claims 10-12 are allowed.

#### Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roz Maiorino whose telephone number is 703-305-2336. The examiner can normally be reached on 8:30am-4:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian Casler can be reached on 703-308-3552.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0858.
